RE: Wind Farm: 6 Wind Turbines - Cottam, ON

Dear Ms. Kausel,

We have evaluated the captioned proposal and NAV CANADA has no objection to the project as submitted. Let me emphasize however that our assessment is limited to the impact of the proposed physical structure on the air navigation system and installations.

In the interest of aviation safety, it is incumbent on NAV CANADA to maintain up-to-date aeronautical publications, and issue Notices to Airmen (NOTAM) as required. To assist us in that end, we ask that you notify us at least 10 business days prior to the start of construction. This notification requirement can be satisfactorily met by returning a completed, signed copy of the attached form to us by mail, or fax at (613) 248-4094. In the event that you should decide not to proceed with this project or if the structure is dismantled, please advise us accordingly so that we may formally close the file.

Please note: The evaluation of this Land Use Proposal at the coordinates provided was for the proposed 6 wind turbines only. The nature and magnitude of electronic interference to NAV CANADA ground based Navigation Aids including RADAR due to wind turbines depends on the location, number, and size of turbines. Therefore all turbines must be considered together for analysis. The interference of wind turbines to certain Navigation Aids is cumulative and while the initial turbines may be approved, continued development may not always be possible.

If you have any questions, contact the Land Use Department by telephone at 1-866-577-0247 or e-mail at landuse@navcanada.ca

NAV CANADA's land use evaluation is valid for a period of 12 months. It neither constitutes nor replaces any approvals or permits required by Transport Canada, Industry Canada, other Federal Government departments, Provincial or Municipal land use authorities or any other agency from which approval is required.

Yours truly,
